Made in France

Technical Characteristics

Environmentally-friendly manufacturing:

Mono-material recycled products that are re-usable, recyclable, biodegradable and compostable.

All these products are made in France. They are 100% recyclable and re-usable as they are assembled by interlocking and folding (without glue or other assembly material such as staples, screws etc.) Packed flat in kit form to **reduce transport and storage volume by up to 98 %**. The packaging takes up no more than 2% of the assembled furniture volume.

Double and triple fluted corrugated cardboard: made from 7 or 5 sheets of kraft or recycled paper bought in rolls transported by sea, rail and road. The wood for the kraft paper comes mostly from sustainably managed forests It conforms to environmental standard ISO 14001. The cardboard is corrugated in our partner factories with water-based glue and the inks and rinsing water pass through an on-site treatment plant and are re-used in a closed circuit. The waterproof coating on the tables is obtained with a non-toxic starch-based varnish. The cardboard is die-cut with blunt feathered edges.

Mini-micro: single layer corrugated cardboard with one side micro-fluted, made of two sheets of kraft from 100% recycled fibres, water-based glue and starch. (e.g. the Vases)

Micro: micro-fluted double-sided corrugated cardboard, made of three sheets of kraft from 100% recycled fibres, **water-based glue and starch**. (e.g. the miniatures and Eiffel Tower cards)

Microbis: Double micro-fluted corrugated cardboard, made of five sheets of kraft from **100% recycled fibres**.

Compact Kraft, grey anthracite fibreboard: high density cardboard, rigid, non-brittle, with a good pliability. Made from long **cellulose 100% recycled fibres**. Mass treated : Glues, resins, starch, dyes.

Ecocards: made from recovered paper, Ecocard cardboard is a natural product which has been designed to preserve the environment. These products are made in France in the purest paper-making tradition without any bleaching agent. Different colours in stock: 14 colours 100% recycled, and Alabaster 80% recycled. In April 2010, this cardboard was awarded the German «Blue Angle» label complying with even higher standards.

MICROBIS AND CORRUGATED CARDBOARD:

simple, double and triple fluted

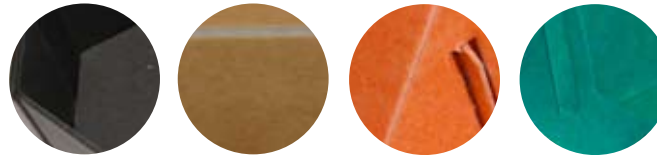

80 to 100% recycled & 100% recyclable

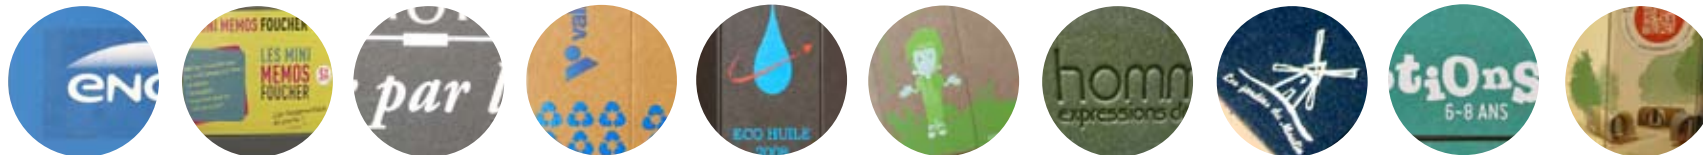

COMPACT CARDBOARDS:

Compact kraft, Fibreboard and Ecocard

100% recycled & 100% recyclable

POSSIBLE CUSTOMISATIONS: adhesive, Screen-printing, Flexo, Full colour digital, Acrylic painting, hot stamping, offset printed card laminate

CARDBOARD

Small Cardboard Objects (Patented)

Made in France

All these objects are made in France from 100% recycled cardboard and are 100% recyclable: Mini-micro, Micro, Microbis and Ecocard. Delivered flat, they are assembled by interlocking. Customisation options are printing, hot stamping or lamination.

Mini-bin 2 sizes of cardboard miniature waste bin with offset printed customisation.

Eiffel Tower Model scale 1/1135. Kraft or tricolour laminate. Design O. LEBLOIS

Cardboard Armchairs scales 1/4 and 1/5. Design. O. LEBLOIS

Set of 11 miniatures scale 1/8 – Eight cards to make 11 pieces of furniture with brown or white paper. Design O. LEBLOIS

Mini-bin: h 19 x 7 x 7 cm / 40 x 15 x 15 cm
Eiffel Tower: h 27 x 10 x 8 cm
